

SOUND MASKING IN CORPORATE ENVIRONMENTS

CLIENT SPOTLIGHT — Monster.com

About the space

A unique space for the leading career matchmaker

Monster.com's Maynard, Massachusetts office is in a unique, 100-year old former mill building consisting of exposed brick, wooden beams and many large windows.

Challenge

Beautiful office, distractions abound

The brick, exposed beams and large windows are highly sound-reflective elements. Combine these elements with the spaces 15-foot ceilings, and the space has a variety of acoustical challenges that lead to distractions for the employees.

Solution

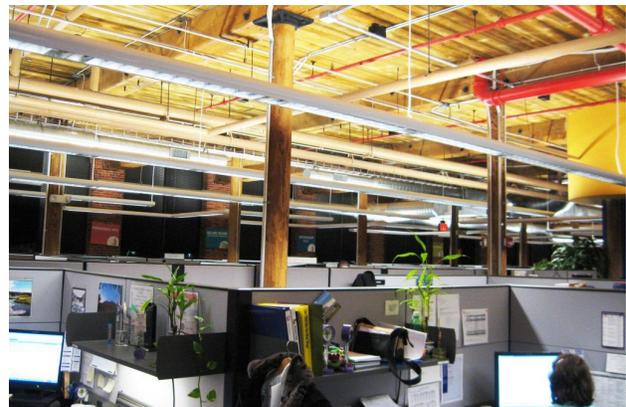

Qt Quiet Technology™ - a better acoustic environment

The Qt Quiet Technology sound masking controls were specified throughout the space. Qt Emitters were attached the beams and other elements in the space.

Result

A productive and comfortable office space

The Qt Quiet Technology system eliminated reverberations within the space and created a comfortable, highly productive work environment.
